SUMMARY

My expertise in computer science and my Amazon AWS data engineering certification make me a formidable contender for the Summer Analyst position at Goldman Sachs. My studies and practical experience have equipped me with the skills necessary to work with large, complicated data sets, create scalable solutions, and draw insightful conclusions from the data. My web development projects have also improved my ability to arrange and display data to produce designs that are simple to understand and easy for users to interact with. I'm thrilled to have the chance to use these technical skills in the fast-paced environment of Goldman Sachs and expand my knowledge of corporate strategy and finance.

PROJECTS

Data Analysis For NETFLIX

- Developed a Python-based data analysis project for Netflix.
- Analyzed and interpreted data to extract actionable insights.
- Performed data manipulation and visualization to enhance understanding.
- Generated reports to support decision-making processes.
- Focused on improving user experience through data-driven insights.

Virtual Herbal Garden for Ministry Of AYUSH

- Participated in Smart India Hackathon, developing a Virtual Herbal Garden for the Ministry of AYUSH.
- Used HTML, CSS, and JavaScript to create an interactive and user-friendly interface.
- Incorporated 3D models to provide an immersive experience of herbal plants.
- Focused on enhancing visualization and educational value through digital design.

EDUCATION

Bachelor of Technology

October 2022 - 2026

Galgotias University, Noida, UP

- Computer Science Engineering. (CGPA- 8.1)
- "Innovations in Sustainable Business Practices".

Intermediate

April 2020 - March 2022

Dayawati Modi Academy, Rampur, UP

- Demonstrated strong analytical and problem-solving skills.
- Participated actively in extracurricular activities promoting teamwork and leadership.

CERTIFICATES

- **Data Engineering**
(Amazon AWS)
- **Android Development**
(Google)
- **Packet Tracer Using Java**
(CISCO)
- **Azure Fundamentals I,II,III**
(Microsoft)

SKILLS

- Python
- Java
- SQL
- Java Script
- MERN Stack
- Web development
- MS Office
